

AMENDED IN ASSEMBLY JULY 3, 2001

AMENDED IN SENATE JUNE 4, 2001

AMENDED IN SENATE APRIL 16, 2001

SENATE BILL

No. 672

Introduced by Senator Machado

February 23, 2001

An act to *amend Section 10620 of, and to add Section 10013 to the Water Code, relating to, water.*

LEGISLATIVE COUNSEL'S DIGEST

SB 672, as amended, Machado. California Water Plan: *urban water management plans.*

~~Existing~~

(1) *Existing* law requires the Department of Water Resources to update every 5 years the plan for the orderly and coordinated control, protection, conservation, development, and use of the water resources of the state, known as the California Water Plan.

This bill would require the department to include in the California Water Plan a ~~plan for facilitating~~ *report on the development of regional and local water projects within each hydrologic region of the state to improve water supplies to meet municipal, agricultural, and environmental water needs and to minimize the need to import water from other hydrologic regions.*

(2) *Existing* law requires every urban water supplier to prepare and adopt an urban water management plan.

This bill would require an urban water supplier to describe in the plan water management tools and options used by that entity that will

maximize resources and minimize the need to import water from other regions.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.

The people of the State of California do enact as follows:

1 SECTION 1. The Legislature finds and declares all of the
2 following:

3 (a) The Department of Water Resources, through its contracts
4 for delivery of water from the State Water Project, has established
5 water entitlement objectives for approximately 4,200,000 acre
6 feet.

7 (b) Municipal, agricultural, and environmental water needs
8 have increased beyond levels anticipated in the California Water
9 Plan and the State Water Project has not developed water projects
10 that will yield the quantity of water established as water
11 entitlement objectives.

12 (c) The health, safety, and well-being of the people of
13 California will best be served by meeting the municipal,
14 agricultural, and environmental water needs of each hydrologic
15 region without diminishing the resources of other regions that are
16 necessary to meet the present and future municipal, agricultural,
17 and environmental needs of those regions.

18 (d) The health, safety, and well-being of the people of the State
19 of California will best be served by employing current and
20 developing water treatment and conservation technologies and by
21 implementing the principles set forth in the Cobey-Porter Saline
22 Water Conservation Law (Chapter 9 (commencing with Section
23 12945) of Part 6 of Division 6 of the Water Code) to the maximum
24 extent practicable.

25 SEC. 2. Section 10013 is added to the Water Code, to read:

26 10013. (a) The department, as a part of the preparation of the
27 department's Bulletin ~~160-2008~~ 160-03, shall include in the
28 California Water Plan a ~~plan for facilitating the development of~~
29 *report on the development of regional and local water projects*
30 within each hydrologic region of the state, as described in the
31 department's Bulletin 160-98, ~~to improve water supplies to meet~~
32 ~~municipal, agricultural, and environmental water needs and to~~
33 ~~minimize the need to import water from other hydrologic regions.~~

~~(b) For the purposes of carrying out subdivision (a), the department shall include a discussion of the use of technologies, to the maximum extent possible, to desalt brackish groundwater and ocean water, water reclamation for use within the community generating the water to be reclaimed, the construction of improved potable water treatment facilities so that water from sources determined to be unsuitable can be utilized, and the construction of dual water systems and brine lines particularly in connection with new developments and when replacing water piping in already developed or redeveloped areas.~~

~~(c) For the purposes of carrying out subdivision (a), the department is encouraged to consult the Governor's office to coordinate with other states and Mexico when addressing those hydrologic regions that share a common regional water supply with those other entities.~~

~~(d) The department shall also include estimated costs and make recommendations for funding of projects described in the amendment.~~ *. The report shall include, but is not limited to, regional and local water projects that use technologies for desalting brackish groundwater and ocean water, reclaiming water for use within the community generating the water to be reclaimed, the construction of improved potable water treatment facilities so that water from sources determined to be unsuitable can be used, and the construction of dual water systems and brine lines, particularly in connection with new developments and when replacing water piping in developed or redeveloped areas.*

SEC. 3. Section 10620 of the Water Code is amended to read:
10620. (a) Every urban water supplier shall prepare and adopt an urban water management plan in the manner set forth in Article 3 (commencing with Section 10640).

(b) Every person that becomes an urban water supplier shall adopt an urban water management plan within one year after it has become an urban water supplier.

(c) An urban water supplier indirectly providing water shall not include planning elements in its water management plan as provided in Article 2 (commencing with Section 10630) that would be applicable to urban water suppliers or public agencies directly providing water, or to their customers, without the consent of those suppliers or public agencies.

1 (d) (1) An urban water supplier may satisfy the requirements
2 of this part by participation in areawide, regional, watershed, or
3 basinwide urban water management planning where those plans
4 will reduce preparation costs and contribute to the achievement of
5 conservation and efficient water use.

6 (2) Each urban water supplier shall coordinate the preparation
7 of its plan with other appropriate agencies in the area, including
8 other water suppliers that share a common source, water
9 management agencies, and relevant public agencies, to the extent
10 practicable.

11 (e) The urban water supplier may prepare the plan with its own
12 staff, by contract, or in cooperation with other governmental
13 agencies.

14 (f) *An urban water supplier shall describe in the plan water*
15 *management tools and options used by that entity that will*
16 *maximize resources and minimize the need to import water from*
17 *other regions.*
